***Allowable Subject Matter***

Claims 24-28 and 30-36 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process as called for in claim 1. The closest art of record - Marchionna et al (US 2004/0010171) - discloses a process discussed in the previous Office action. However, Marchionna does not disclose using an olefinic feed and a final butene product as called for in the present claims. Marchionna discloses using a starting feed which is produced by dehydrogenating paraffins. Further, Marchionna discloses on paragraph [0036] using a catalyst which hydro-isomerizes 1-butene to 2-butene. This teaching is opposite with the claimed process which produce a butene stream enhanced in 1-butene purity compared to the initial C4 olefins stream.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
